Due to the heat today, the lining of the 60" outfall has been postponed until this evening. I will send out a revised schedule when start times become final. You are still welcome to head out to the site this morning if you wish. There will just not be much activity to observe.

All, there has been a minor change in the schedule. No CIPP lining activities will take place on Monday afternoon 7/27. Only H&S training will be completed on this day as well as some equipment set up. We will begin lining the 60" storm water line on Tuesday 7/28. To maximize your CIPP

viewing, plan to arrive at the site at 8am Tuesday 7/28.

Subject: Willbridge 60" Lining - Visiting the site

All, we are well on our way towards lining the 60" storm water line. If you wish to visit the site, we have set up a **site viewing area** outside of the exclusion zone that will not require any special training. No untrained site visitors will be allowed into the exclusion zone without prior approval. Note: you will need to bring a **hard hat** and **safety glasses** to access the viewing area. Hearing protection will be supplied if necessary. David Rasar (206.321.5272) with ARCADIS will be your site contact. **Please call him if you would like to set up a site visit.**

Directions to the site. The site address is 5888 NW Front Ave. Please use any online mapping tools for directions from your location. Most likely, you will have to access the part of the industrial district via Kittridge Ave (off of Yeon) or Front Avenue (from downtown). Please keep in mind that some people think Front Ave is a highway. People tend to drive way too fast on this road. Please be careful.

Parking at the site. Please see the photo below for parking area. Please fully expand this email to make sure the photo hasn't been cropped in any way. Notice the red shaded area. There should be sufficient parking there. You will need to make a left onto Doane Ave to access the driveway (designated by the 2 yellow lines). Be very careful crossing the street!!! As I mentioned before, people tend to drive very fast on this road. Make sure you look both ways before crossing the street and also make sure that your line of sight is not obstructed by parked trucks or other vehicles. The white star is the work area.

Site viewing area. The site viewing area is indicated below by the red shaded area. This site viewing area is located on the High Purity Products site. Construction fence has been installed to delineate the viewing area on their property. Do **not** go outside of this viewing area. You should have a very nice view of the work area from that location. A chain-link fence will separate you from the exclusion zone. Again, please coordinate your arrival with David and he will make sure this area is open for you. Note: the work area is a MARSEC-regulated area. The white star is the work area.

Schedule. We are pretty much on schedule. The approximate schedule for the remainder of this week and next week is as follows:

Friday 7/17: Complete saw cut of vault top

Monday 7/20: Set new vault top

Tuesday: Secure vault top

Wednesday: Backfill and remove shoring

Thursday: Install water diversion

Friday: Complete gravel roadway

Monday 7/27: Morning H&S training. Afternoon CIPP.
Tuesday: Continue CIPP

If you have any questions, please call me.
